### References :

Automotive Quality Solutions provided the following training courses in our company:

- Risk Management Handbook for Suppliers FCA (09/06/2023) – 6 Participants
- QRQC training – developing competence of production management teams and quality problems analysis (28-29/07/2023 – 26-27/10/2023) – 20 Participants
- 27-28/09/2023 8D problem-solving methodology – 9 Participants
- 11-12/12/2023 – FMEA AIAG-VDA – 9 Participants

The training was professionally prepared and conducted by high-level specialists who professionally transferred shared knowledge and experience.

All the teams involved in the various courses were interdisciplinary teams composed of people from the various departments such as: Quality, Maintenance, Production, Logistics and New Project Implementation.

The participants are very satisfied with the quality of the training and involvement in the workshops on our concrete cases including GEMBA field check and on other cases brought as examples.

We recommend Automotive Quality Solutions as a provider of training services with a view to competence development and employee qualification.

Felice De Santis

Quality Assurance Manager
